

## How to configure the search & extract of E-Mail Addresses using the eDoc E-Mail Plugin

For search, extract and use the e-mail addresses from the sample document, the option **Search document for e-mail addresses** must be checked on.

From the **E-Mail Search Settings** dialog, you can set the strings that marks the begin and end of the search area of e-mail addresses, separated by “;” character (see the image below)
